Start
Literature survey and requirement analysis
Design architecture, Q&A framework, prompts and story-flow model
Implement backend modules, interface and multimodal pipelines
Phase 1: evaluate the framework (50 stories, user study, $n = 15$)
Build Q&A-to-story dataset in the system's prompt format
Fine-tune Llama 3.2 3B with QLoRA; export adapter; deploy locally
Phase 2: held-out comparison of pretrained and fine-tuned model
Analyse results and write report
End
